EMBEDDED SOFTWARE ENGINEER INTERN

Jun. 2023 - Dec. 2023

- *Worked on the development of automated vehicles. Programmed the robotic arm of an electric loader to ensure precise vertical lift path control. Designed its control system using Parker IQAN software. Modeled the arm's search space with Denavit–Hartenberg notation and applied forward and inverse kinematic analysis.*

Volunteering Activities

Women in Mathematics Program

University of Waterloo

MENTOR

Winter 2026

- *Designed and led a Women in Mathematics Directed Research Program project, mentoring undergraduate students on formally verifying SAT-solver encodings in Coq—working on a verified library that extends the FMCAD'23 Verified Encodings work toward cardinality, pseudo-boolean, and symmetry-breaking constraints.*
- *Recipient of the Women in Mathematics Mentorship Award for mentorship contributions.*
